Design & AI student (B.Sc., SUTD, graduating May 2027) bridging product design and engineering, taking ideas from user research to tested prototype to shipped code.

SELECTED PROJECTS

GrantPal – AI grant management platform **May 2025 to Aug 2025**

Being Bridges Pte Ltd (social enterprise) · Technical Lead

- Led the build from concept to web deployment (React, Flask), including the dashboard the team uses to track grants.
- Built AI modules for grant eligibility analysis and drafting (OpenAI API) and Google Calendar deadline tracking, cutting manual review and follow-up time.

DocTranslate – Private translation tool for Word and PowerPoint **Nov 2025 to Oct 2026**

Self-initiated at Hegen · Design and development

- Built outside my role after seeing colleagues hand-translate confidential files; colleagues on the project used the Windows app.
- Rebuilt as a web app (React, TypeScript) that runs on any computer, never uploads files and adds a review step.

POUR – Figma plugin for accessible design **Aug 2026 to Oct 2026**

Design challenge, GovTech Singapore · User research, pitch and plugin development

- Researched designer and developer needs; pitched a plugin that checks designs against WCAG 2.2 AA and turns each issue into a note developers can act on.
- Contributed to the plugin code (Figma Plugin API, SGDS web components, JavaScript).

NomQuest – Social eating app for busy working adults **Jun 2025 to Aug 2025**

HCI and AI course, SUTD · Team of five · Research, prototyping and testing

- Ran user interviews and three rounds of usability testing with 69 participants in total, iterating the design after each round.
- Prototyped from paper sketches to interactive Figma flows; tested with Maze.

WORK EXPERIENCE

22 Media Pte Ltd – Software Engineer Intern, Mobile App Tech Team **Jun 2026 to Sep 2026**

- Turned Figma designs and product requirements into interactive prototypes, reusable React Native UI components and user flows.
- Wrote the component guidelines and naming conventions that kept design and code in sync across the team.
- Contributed to a production React Native codebase through GitHub PRs, code review and debugging; used Claude Code and Codex to prototype and iterate faster.
- Praised by the Software Engineering Lead for “turning Figma visual models into functional, interactive prototypes.”

Hegen Pte Ltd – Project Management Intern, Strategy and Transformation **Sep 2025 to Dec 2025**

- Initiated and delivered an AI-powered internal translation tool, improving secure document workflows.
- Supported the enterprise website redesign and LMS implementation; produced analytics reports for management decisions.

SUTD STEAMunity Programme – Advanced Design Mentor **May 2025 to Aug 2025**

- Coached student teams over four months from problem exploration to functional prototype, including an AWS-sponsored challenge, through stakeholder alignment and iterative feedback.
- Facilitated design sessions that helped students earn Advanced Design Innovator certification.

RSM Stone Forest – Full Stack Engineer Intern, MIS Department **Sep 2020 to Feb 2021**

- Independently designed and built a full-stack onboarding platform prototype; automated billing report generation with audit professionals.

EDUCATION

Singapore University of Technology and Design – B.Sc. Design & AI (Minor in Computer Science) **Sep 2023 to May 2027**

- Global Exchange Programme, Dankook University (Mobile Systems Engineering)

Nanyang Polytechnic – Diploma in Business Informatics (Business Analytics & Entrepreneurship) **Apr 2018 to Mar 2021**

SKILLS & ADDITIONAL INFORMATION

- **Design:** Figma, interactive and paper prototyping, user interviews, usability testing (Maze), WCAG accessibility
- **Build:** React Native, React, Laravel/Livewire, Flask, Python, OpenAI API, Claude Code
- **Leadership:** Welfare Director, DAI Programme; Outreach Director, SUTD Mountaineering Club; Hostel Warden, SUTD; Church Youth Leader; Detachment Commander, 10 C4I Battalion (NS)
- Fluent in English and Mandarin (spoken & written) · Grade 8 Piano
